

### Navigation (closed)

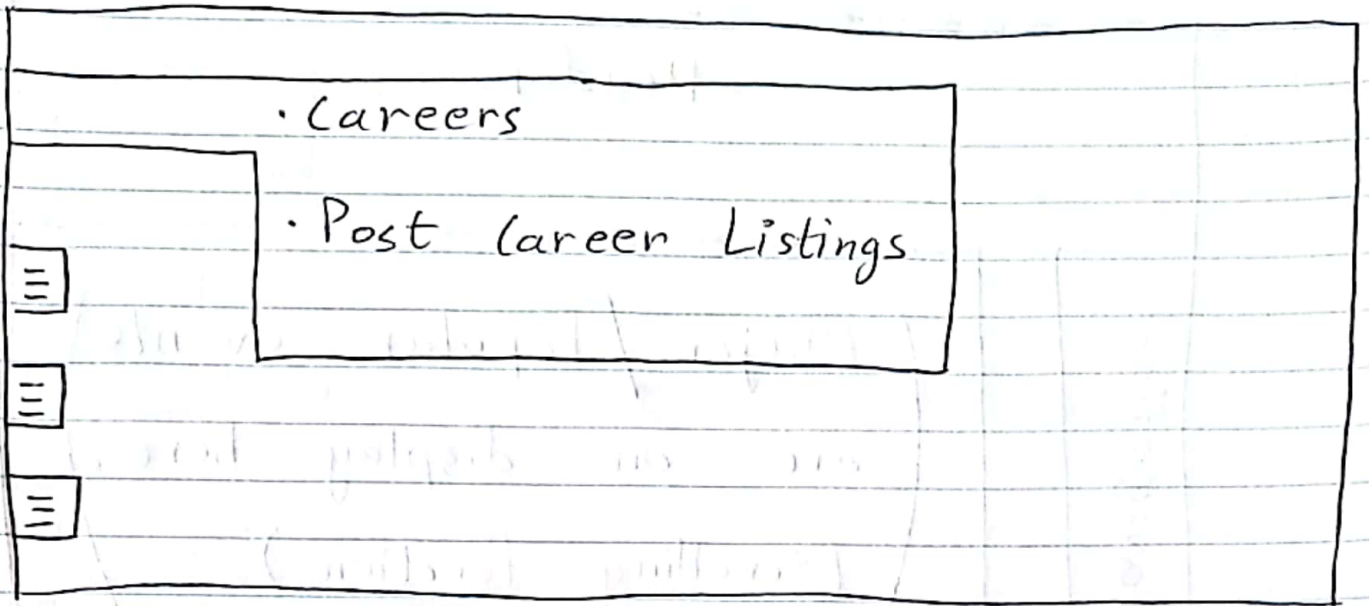

Note: These are closed navigation tabs which will open when user hovers mouse - pointer over the tabs. Navigation is stuck and always displayed (even on scrolling)

### Footer

## Navigation (Open)

Note : When the tab opens, it will slide out and expand over the main area of the page.

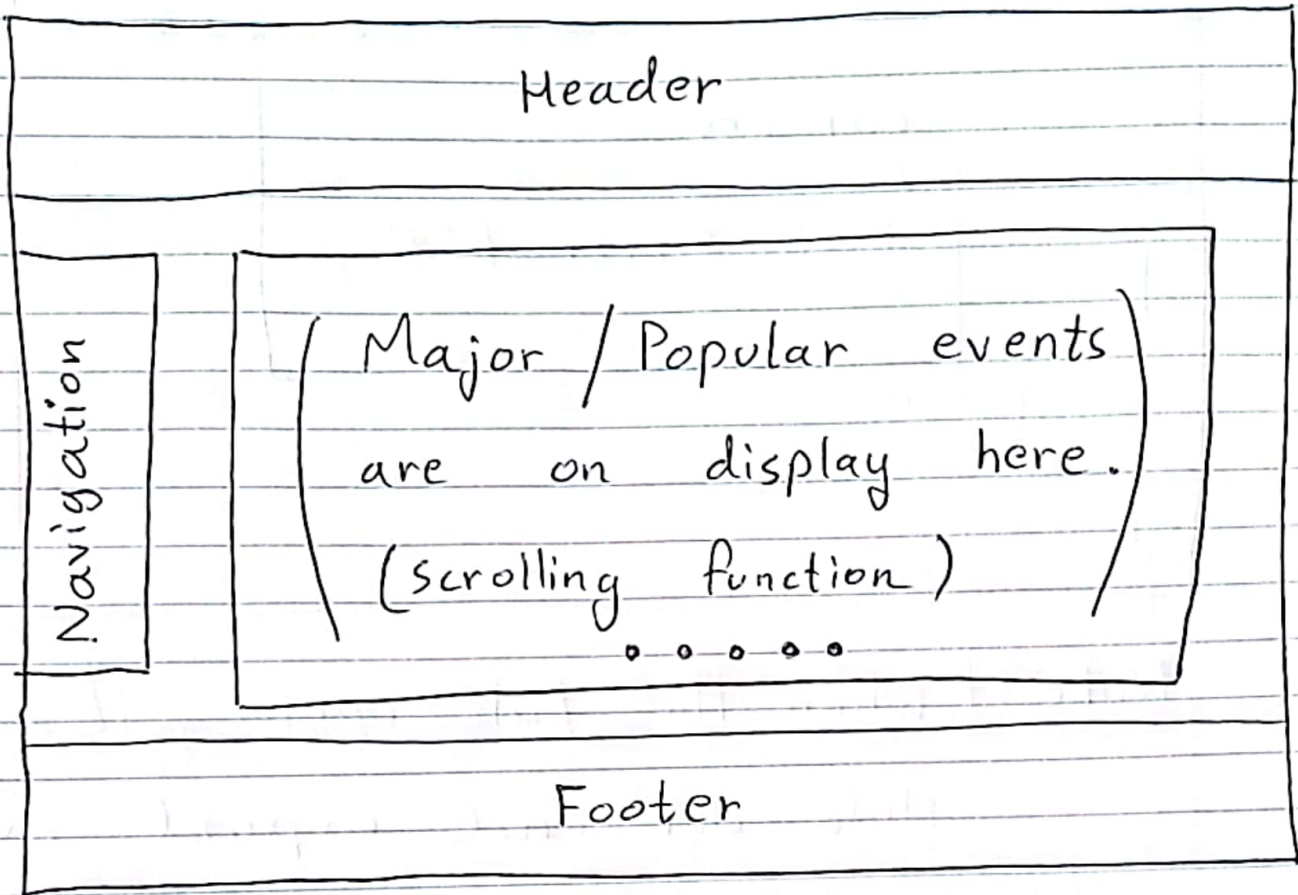

The other tabs will shrink.

Also the main content on the page will get blurred out

(Like Amazon)

In navigation, clicking on page link will take user to that page

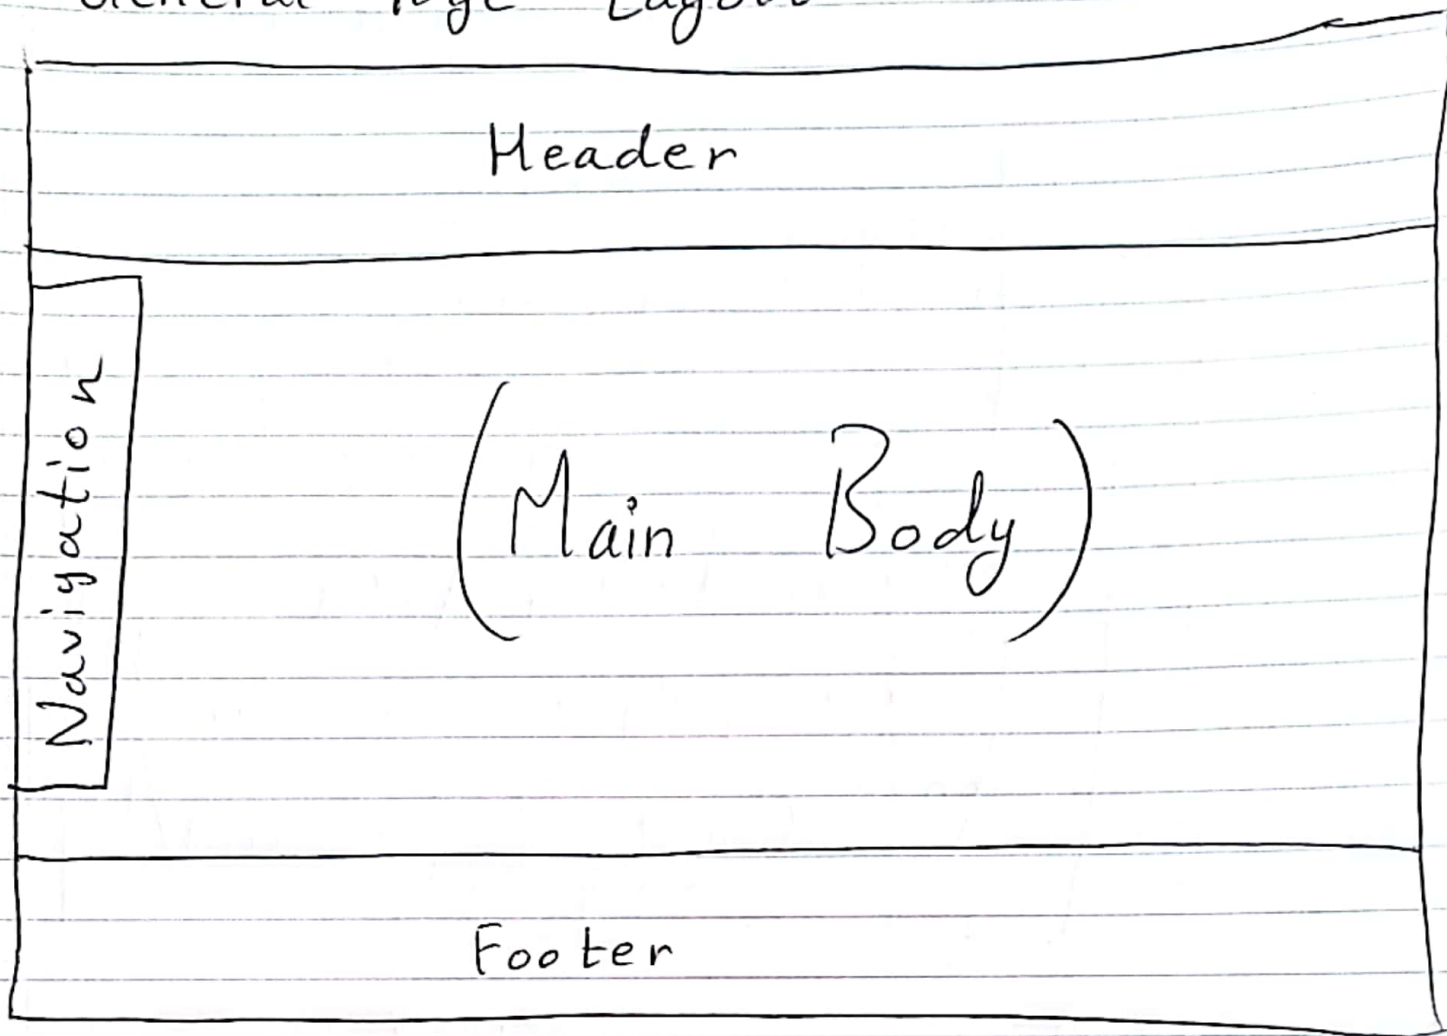

## Home Page

Header, Footer, and navigation will be displayed on every other page in the same manner.

# General Page Layout

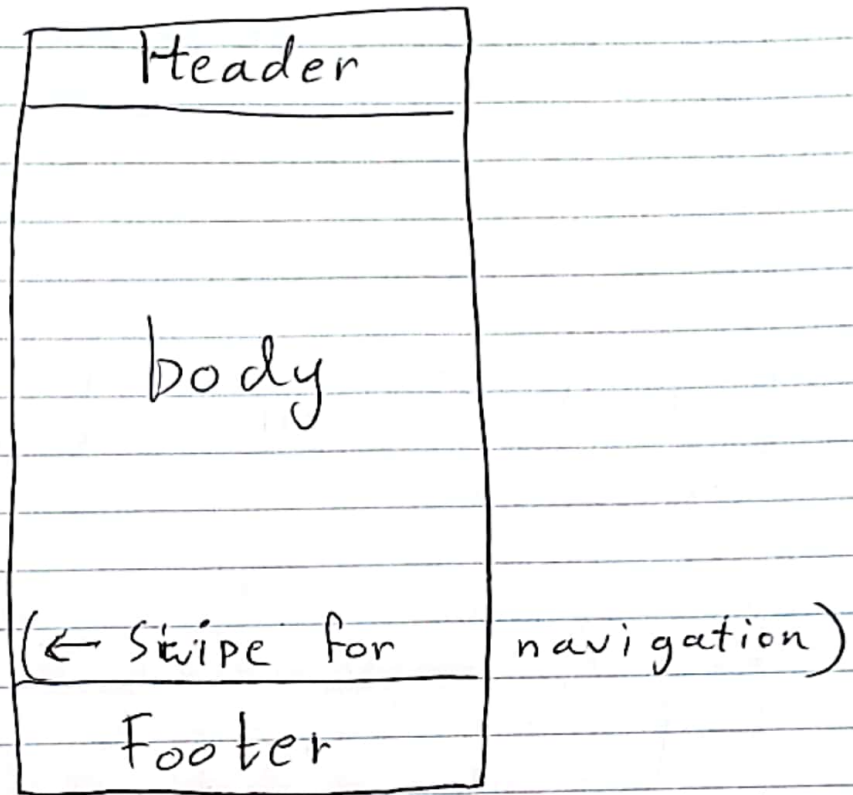

Navigation = ~~Stuck~~ Relatively stuck  
so can be accessible  
no matter how much  
user scrolls

Header = <sup>Fixed</sup> ~~Stuck~~ at Top so disappears  
when user scrolls down a  
page

Footer = <sup>Fixed</sup> ~~Stuck~~ at bottom so only  
visible when user scrolls  
completely to the bottom.

## Mobile layout

On mobile devices, swipe for opening the navigation panel.
