

ENSE 271 Activity 3

High Fidelity Prototype Linked to Class Topics:

1. The design is easy to navigate, and colour coded for the mobile version to match navigation buttons with the pages.

2. Symbolizing some of the features in the website to make it easy to understand its functionality, we used the sun to differentiate between dark/light mode.

3. There is an option “Not implemented yet” for switching between English and French. This is regarded as a cultural / language constraint.
